EDUCATION

- **Princeton University**, *B.S.E. in Computer Science* Princeton, NJ, 2019-2023

EXPERIENCE

- **Fannie Mae (via Genspark)**, *Data/Cloud Engineer* Chicago, IL, May 2024 - October 2024
 - Developed and deployed AWS-based solutions, including EC2 instances and Redshift, for data processing and storage.
 - Performed ETL operations and SQL-based CRUD tasks for data validation and transformation in collaboration with Data Analysts.
 - Led development of a full-stack DBMS using Java, Spring Boot, Hibernate, MySQL, and Angular.
- **Amazon Web Services**, *Software Development Engineer* Seattle, WA, June 2022 - September 2022
 - Built and administered APIs for Kubernetes clusters to triage alarms and resolve large-scale AWS cluster issues.
 - Utilized Java, Bash scripting, and AWS pipelines to automate processes and improve system reliability.
 - Contributed to rapid recovery solutions for server shutdowns, ensuring high availability across hundreds of clusters.
- **Applications of Computing Machinery**, *Technology Chair* Princeton, NJ, September 2022 - May 2023
 - Maintained and updated ACM website using JavaScript, HTML/CSS, and Ruby for event and roster management.
 - Organized technical workshops and competitive programming events in collaboration with Princeton Research Computing.
 - Provided leadership in technology initiatives, earning the Computer Science Service Award for exceptional contributions.

PROJECTS

- **Movie Browser** *Project Owner, Web developer* July 2024
 - Developed a web application enabling users to browse movies, filter by genre, and save movies as favorites.
 - Integrated the OMDb API service to retrieve information like movie posters, cast, director, and ratings.
 - Assigned tasks to team members, using the agile methodology(Kanban), to ensure accountability and progress.
 - <https://github.com/habioye/MovieBrowser>
- **Distributed and Concurrent Replicated State Machine** *Software Developer* September 2022 - December 2022
 - Built a concurrent fault-tolerant key-value storage service structured as a replicated state machine with multiple key-value servers coordinating through RPCs.
 - Designed the system to maintain fault tolerance, processing client requests as long as the majority of servers are available, and could communicate, despite failures or network partitions.
 - <https://github.com/habioye/Distributed-and-Concurrent-Replicated-State-Machine>

TECHNICAL SKILLS AND INTERESTS

Certifications: AWS Solutions Architect Associate (SAA) and Azure Deploying Cloud-Native Applications.

Software Challenges: Azure Engineer Innovation Challenge and Azure AI Engineer Innovation Challenge.

Programming Languages: Python, C++, Java, TypeScript, JavaScript, and SQL

Frameworks & Tools: Git, Spring/Spring Boot, Hibernate(ORM), Angular/React, and RESTful APIs(Postman)

Other: Terminal Shell Scripting, Microservices, Distributed Systems, and ETL operations.

Applicable Coursework: Distributed Systems, Leadership Development for Business, Economics and Computing, Machine Learning for Predictive Data Analytics, Advanced Programming Techniques, and Principles of Computer System Design.

SOFT SKILLS

- Organizational leadership, agile methodology (Kanban), and effective communication.
- Effective communicator with experience collaborating across technical and non-technical teams.
- Strong problem-solving and abstract thinking skills for complex challenges.
- Leadership experience in project management and organizational roles.

ACHIEVEMENTS

- **Princeton Computer Science Award** *Recognized for exceptional service as the Technology Chair of ACM. 2022-2023*
- **Ron Brown Captain** *Selected among the top 2% of applicants. 2019-2023*
